Teat placement (rear)	94	wide							close
Teat direction (rear)	108	outwards							inwards
Udder cleanness	106	add. teats							clean udder

Polled fitness specialist!

Malaga Pp, bred by the Butz family, comes out of an old Swabian cow family that stands out for long living, high yielding cows with high milk protein. Especially the Haxpat-daughter Doro, born in 1994 attracts attention with a lifetime production of 145.151 kg milk in 13 lactations! This outstanding polled sire promises late-maturing cows with nice frames, excellent feet and legs and perfect udders. The udders will be tight, well-attached with a firm central ligament and thus will last several lactations. Malaga Pp can be used to improve all fitness traits and also is suitable for heifers.

High Ecological Total Merit Index!
