Fleckvieh SEHRGUT Marlise

Fleckvieh SEHRGUT Romeika

The translation of the name SEHRGUT is „Very Good“. Fleckvieh sire Sehgut has a high TMI, since he sires a high milk index with more than +1,000kg milk and positive protein percentage plus above average beef value. His daughters present optimum frame and functional type with good feet&legs and extremely long udders and strong central ligament. The well-developed and longer teats can compensate fine teats. SEHRGUT derives from an extremely long-lasting and high performing cow family. Dam Emili, a well-known show cow has meanwhile eight lactations with in average almost +12.000 kg milk and +906kg fat+protein. In the functional traits especially the excellent udder health and calve vitality of SEHRGUT stand out. His very easy calvings confirm him as perfect choice for heifer inseminations!
