Teat length	108	short							long
Teat thickness	105	thin							thick
Teat placement (front)	84	wide							close
Teat placement (rear)	99	wide							close
Teat direction (rear)	99	outwards							inwards
Udder cleanness	95	add. teats							clean udder

Brown Swiss VERDI Urm

VERDI was and is the Brown Swiss sire who is very popular among the Brown Swiss breeders because of his protein percentage +0,17%. Additionally his functional traits with the outstanding Longevity, udder health and persistency are very appealing. His daughters are expected to be functional cows with an average type. All in all, his breeding pattern is very close to his dam Idro. Pronto daughter Idro bred by Hubert/Jörg Betzigau represents exactly these traits and although she has meanwhile her 9th calve she is presenting herself in a great shape.
